

WT-4416 Double sided adhesive tape

PRODUCT AND APPLICATION DESCRIPTION

WT-4416 is excellent for bonding plastics with low surface tension. The tape is also suitable for many other substrates such as polypropylene and polystyrene

- | Can be used for indoor areas
- | Good UV resistance

TECHNICAL DATA

Carrier material:	Acrylic foam, 850 kg/m ³
Thickness: (without liner)	1.1 mm ± 0.1 mm
Liner:	Red PE foil
Adhesive:	Acrylat
Tensile strength:	7200 g/cm ²
Shear force:	6700 g/cm ² (after 24 h)
Temperature range:	-40 °C to +90 °C (short term until 150°C)
Available colors:	White

FURTHER INFORMATION

To achieve the optimal adhesive strength, the substrate must be free from separating agents such as greases, oils, surfactants, dirt and dust. The storage has to be dry and UV-protected between +5 °C and +25 °C.

Note

The product information listed above has been compiled to the best of our knowledge and is based on current data. The properties mentioned are typical but therefore do not constitute a specification. The information provided does not relieve the customer of his obligation to test for suitability for the intended applications and processes. All specifications are subject to change without notice. Colour variations are possible.
