

WT-5230 PET High Temperature Tape

PRODUCT AND APPLICATION DESCRIPTION

WT-5230 is a polyester foil coated with a pressure sensitive high temperature silicone adhesive. The tape has a very good adhesion and is extremely heat and UV resistant. It is suitable for covering printed circuit boards and during powder coatings.

- | Can be used for indoor areas
- | High temperature resistance
- | High insulation performance

TECHNICAL DATA

Carrier material:	Polyester foil
Thickness: (without liner)	0.09 mm
Adhesive:	Silicone adhesive
Adhesive strength:	≥ 8 N/25 mm
Temperature range:	up to +220 °C
Application temperature:	+5°C to +35°C
Available colors:	Transparent green

FURTHER INFORMATION

To achieve the optimal adhesive strength, the substrate must be free from separating agents such as greases, oils, surfactants, dirt and dust. The storage has to be dry and UV-protected between +15 °C and +24 °C.

Note

The product information listed above has been compiled to the best of our knowledge and is based on current data. The properties mentioned are typical but therefore do not constitute a specification. The information provided does not relieve the customer of his obligation to test for suitability for the intended applications and processes. All specifications are subject to change without notice. Colour variations are possible.
